SUMMARY

Experienced React.js Front-End Developer with 3 years of hands-on expertise in building responsive, high-performance web applications. Proficient in JavaScript, React.js, Next.js, Tailwind CSS, and modern UI/UX practices. Recently contributed to scalable front-end solutions at BilliMD using Next.js to enhance performance and SEO. Previously worked with Apple Holidays on dynamic travel applications. Passionate about writing clean, reusable code and collaborating in agile environments. Seeking to contribute React and Next.js skills to a forward-thinking development team.

PROFESSIONAL EXPERIENCE

BilliMD Medical Credentialing | Remote   **2024 - 2025**

Developed a responsive landing page with Next.js and Tailwind CSS, and built an admin dashboard using React.js, FastAPI, and MongoDB for BilliMD to streamline healthcare credentialing and provider management

- Ensuring cross-device compatibility and modern UI/UX.
- Built a user-friendly web platform for medical credentialing and provider enrollment, enhancing operational efficiency.
- Integrated Python (FastAPI) and MongoDB for a secure and scalable backend supporting dynamic healthcare data.
- Designed and implemented role-based access control and authentication flows for enhanced security.
- Collaborated with cross-functional teams to implement features, resolve bugs, and improve application reliability.
- Participated in agile development cycles, contributing to sprint planning, reviews, and deployments.

Apple Holidays Destination Services Pvt Ltd | Madurai   **2023- 2024**

Designed and developed a feature-rich e-commerce platform called AAahaas, offering a wide range of products and services including essentials, lifestyle goods, education resources, hotels, and flights. The application was built from scratch using React.js for the frontend, Laravel for the backend, and MongoDB as the database. Focused on delivering a seamless user experience, strong SEO performance, and scalable functionality — covering the entire development lifecycle from concept to deployment.

Tech Mahindra Pvt Ltd | Chennai   **2021- 2023**

Project :- Hospital Management system

Developed a comprehensive Health Management application from the ground up, progressively integrating various modules using React.js for the frontend, Node.js for the backend, and MongoDB for data storage. Focused on building a scalable, modular architecture to streamline healthcare operations and enhance user experience.
